Le Blanc, France

EDUCATION

Politecnico di Milano
2020-2023
Milano, Italia

Master of Science: Quantitative Finance & Statistical Learning

Ecole nationale supérieur des Mines de Nancy
2016-2021
Nancy, France

French graduate school of engineering: Major in Applied Mathematics

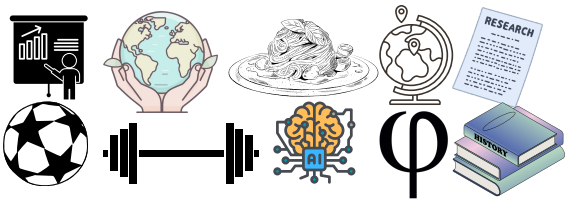
HOBBIES



SUMMARY

A freshly graduated in Master of data scientist and engineer with a strong mathematics, statistics, and computer science foundation. Proficiency in machine learning has been built through internships and collaborative projects with research centers. Many experiences in research and teaching, however ambitioning to apply its knowledge and skills in deep learning to contribute to ethical and impactful projects.

WORKING EXPERIENCE

Lycée Louis PASTEUR, Le Blanc (France)

High school teacher / 2023-2024

- Full time replacement teacher in my former high school, Teaching mathematics and physics

Seasonal student job

- *2022:* Server at Pizza Bella, Le blanc
- 2021: Bank reception manager at Crédit Agricole, Le Blanc
- 2019: Operator in a cheese factory at Eurial, Tournon st Martin
- 2018: Orchard worker at les vergers de Muant, Le Blanc

RESEARCH EXPERIENCE

Politecnico di Milano, Milano (Italie)

Master Thesis / 2022-2023

- Thesis titled "Kantian Evolutionary Game Theory", in collaboration with my Game Theory professor, which led to a published article

Research projects with hospitals in the Lombardy region / 2022-2023

- Computer Vision applied to pulmonary disease detection
- Categorization and evaluation of different therapies for heart failure
- Development of a report on the evolution of tobacco consumption in OECD countries using non-parametric statistical methods

LORIA laboratory, Nancy (France)

Yearly research project / 2019-2020

- Internship with two computer science researchers, involving the optimization of a cryptographic protocol verification algorithm

Institut Elie Cartan de Lorraine, Nancy (France)

Summer internship research / 2020

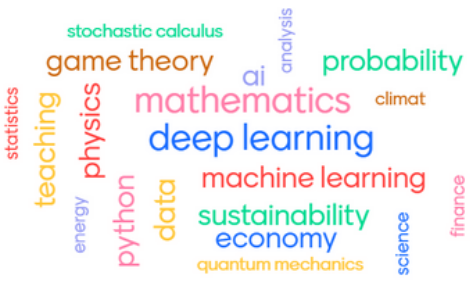
- Research on stochastic processes with a specialist in the field

SKILLS

Python
NumPy, SciPy, Matplotlib, Seaborn, Pandas, Scikit-learn, Tensor-flow, PyTorch, Keras

R
stats, forecast, zoo, MASS, car, rgl, glmnet, lme4, ggplot2, latice, gstat, fda, fields, cluster, dbscan

Matlab
Linear algebra, Calculus, Optimization, PDE

C++
STL, Eigen, parallel computing with MPI


LateX
